Gr. προφήτης an interpreter, proclaimer, spokesman, esp. of the will of the deity; an inspired person, a prophet; f. προ- forth, before, for + φήτης speaker, f. φάναι to speak.]

I. 1. One who speaks for God or for any deity, as the inspired revealer or interpreter of his will; one who is held or (more loosely) who claims to have this function; an inspired or quasi-inspired teacher.

In popular use, primarily connoting the special function of revealing or predicting the future. (HEBER senses 3.)

The Greek συμβίβας was originally the spokesman or interpreter of a divinity, e.g. of Zeus Dodonæus, Apollo, or the deliverer or interpreter of an oracle, corresponding generally to the Latin *vates*. By the LXX it was adopted to render the Heb. נָבִיא *nābī'*, in the O.Test. applied indiscriminately to the prophets of Jehovah, of Baal and other heathen deities, and even to 'false prophets', reputed or pretended soothsayers. In the N.T. it is used in the same senses as in the LXX, but mainly applied to the Hebrew prophets of Jehovah, also to John the Baptist, as well as to certain persons in the Early Church, who were recognized as possessing more or less of the charisma of the old Hebrew prophets, or as inspired to utter special revelations and predictions: also applied likewise to Balaam, and by St. Paul, in the old Greek sense, to Epimenides the Cretan, while 'false prophets' are frequently mentioned. The Greek word was adopted by L. as *propheta*, chiefly in postclassical times, and largely under Christian influences; and this is the regular rendering in the *Itala*, Vulgate, and Christian Fathers. From Ecclesiastical Latin it has passed down into the Romanic and Teutonic languages. In English the earliest uses are derived from the Scriptures; but the word is expressly used in all the ancient senses and in modern ones derived from them.

By the Jews the Scriptures of the O. T. are divided into the Law (תּוֹרָה Torah), the Prophets (נְבִיאִים Nebi'im), and the Hagiographa (כְּתוּבִים Kethubim). The Prophets are divided into the Former Prophets, including the books of Joshua, Judges, 1 and 2 Samuel, 1 and 2 Kings, and the Later Prophets, Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets, Hosea to Malachi. A compendious name for the O.T. Scriptures, often used in the N.T., was the Law and the Prophets or Moses and the Prophets. In Christian usage, the Prophets or Prophetical Books are the Later Prophets of the Jews, with Daniel (which by the Jews is placed among the Hagiographa). The seven Minor Prophets are as a rule omitted. Major Prophets are also in current use.

Gr. πρό, Pro-2 (or πρῶτος first) + πίων, πιον- fat, in reference to its being the first in order of the actual fatty acids (formic and acetic acids, which precede it in the series, not forming acetonous derivatives).

From *propionic* are derived the terms Propene, Propine, Propyl, and the terms under Propio-.]

1. **Propionic acid**, the monatomic monobasic acid of the propyl or tri-carbon series, the third acid of the fatty series, $C_3H_6O_2$, discovered by Gottlieb in 1844, and by him designated *Metacetonic acid*. Its salts are Propionates. Also in *comb.* as *bromopropionic acid*, etc.

In current use, any one of a class of organic compounds, the *proteins*, consisting of carbon, hydrogen, oxygen, and nitrogen, with a little sulphur, in complex and more or less unstable combination; forming an important part of all living organisms, and the essential nitrogenous constituents of the food of animals; obtained as amorphous solids, differing in solubility and other properties, and usually coagulable by heat. Also called *albuminoids*, and very generally *proteids* (see PROTEID[1]).

When the advance of chemical knowledge showed that there was no such definite compound as Mulder's 'protein'; the albuminoid substances of which he had considered it to be the basis continued to be known as the *protein bodies* or *substances*, Ger. *proteïn-stoffe* (see C). To realize the latter, the term *proteïd* (at first *proteïde*) was used by H. WATTS in 1871 in his translation of Gmelin's *Handbook of Chemistry*, also in the *Journal of the Chemical Society*, and the 1878 ed. of Fownes' *Chemistry*, 163), and became common (though not universal) in English use. *Proteïd* had however in German been applied to designate compounds still more complex, e.g. haemoglobin (see Hoppe-Seyler, *Handbuch*, ed. 3, 1867), 1906. There arose confusion in nomenclature, to remedy which a Committee on Proteïd Nomenclature was appointed, and in 1910 recommended the terms of the term *proteïd* in either sense, and the use of *proteins* as the collective name for the *proteïds* or protein bodies.

This recommendation was adopted by the International Congress of Physiologists at Heidelberg in the same year.

The simple proteins are the *protamines*, *albumins*, *albumins*, and *globulins* (derivatives of which are fibrin and myosin). The *conjugated* compounds are the *nucleoproteins* (e.g. globulin and hæmatin), *phospho-proteins* (e.g. vitellin, caseinogen, and casein), *compound proteins* (incl. *nucleo-proteins*), *glucoproteins* (e.g. mucin), *chromo-proteins* (e.g. haemoglobin). Derivatives of proteins are the *albumoses* (or *proteoses*), *albuminates* (formerly called 'albuminates'), *proteanes* (e.g. albumins, globulins, gelatines), *peptones*, *polypeptides*. b. *spec.* In reference to the Church of England the use has varied with time and circumstances. In the 17th c., *Protestant* was generally accepted and used by members of the Established Church, and was even so applied to the exclusion of Presbyterians, Quakers, and Separatists, as is still usual in Ireland, and is still or was lately in some districts of England. In more recent times the sense has been disavowed or disowned by many Anglicans.

In the 19th c., 'protestant' was primarily opposed to 'papist', and thus occupied by Anglican Churchmen generally; a more recent usage, being generally opposed to 'Roman Catholic', or other common Continental and R.C. use to 'Catholic' (see German A. 7, B. 2, 3), it is viewed with displeasure by those who lay stress on the claim of the Anglican Church to be equally Catholic with the Roman.

In compounds already used in Greek, and many of later formation, the Greek practice (represented by the forms *proto-*, *prot-*, *protho-*) is retained, but in modern formations, as in group 2 below, the tendency is to leave *proto-* unchanged: e.g. *protocopiatic*, *proto-hippus*.

3. In Chemistry. **a.** With names of binary compounds in *-ide* (formerly *-uret*), designating that in which the element or radical combines in the first or smallest proportion with another element: e. g. **Protoxide**, **Protochloride** (*† proto-chloruret*), **Protiodide**, **Protosulphide** (*† protosulphuret*), q. v. So **protobromide** (*† protobromuret*), **protocarbide** (*-carburet*), **protocyanide** (*-cyanuret*), **protophosphide** (*-phosphuret*), etc., a compound of bromine, carbon, cyanogen, phosphorus, etc., with another element or radical, in which the bromine, etc., is present in the smallest proportion, or in a smaller proportion than in another (designated by *per-*). Also in the generalized term **proto-compound**. Hence, in derived verbs, ppl. adjs., etc., as **Protoxidate**, **Protoxided**, *proto-or ethuretted*, *-phosphuretted*, *-sulphuretted*, now rarely used.

This use of *proto-* was introduced in 1804 by Dr. T. Thomson, in his *System of Chemistry*, ed. 2, for combinations of oxygen with a metal; *protoxide* being used to denote the first degree or 'minimum of oxidizement': see quot. s. v. Peroxide. It was succeeded by later chemists to similar combinations of other elements, as in 1811 by Pepys (Gilbert), and so on. In later chemical nomenclature, names in *proto-* have been to a great extent superseded by others with more definite numerical prefixes, or in which the constitution of the substance is differently expressed: e. g. *protoxide of manganese* by *manganous monoxide*, or *manganous oxide*; *protochloride* and *protoxide of iron*, by *ferrous chloride*, *ferrous oxide*; *proto-carburet of hydrogen* by *light carburetted hydrogen*, *methyl hydride*, or *methane*. But the *proto-* forms are retained to some extent, especially when they correspond with *none-* compounds, and in pharmacy and popular use.

b. In ternary compounds *proto-* was formerly used to designate salts produced from protoxides (cf. Protosalt), which thus contain the smallest (or smaller) proportion of the acid radical. Thus, *proto-carbonate* or *proto-chlorate of iron*, = the earlier expressions, 'carbonate' or 'chlorate of the protoxide of iron', i. e. the salts formed by the action of carbonic and chloric acid on the protoxide of iron. The latter is now *ferrous oxide*, and the salts are called *ferrous carbonate* and *ferrous chlorate* respectively. So with organic salts, as *protacetate*, *protacetate*; as *protiodate of tin*, the salt produced by the action of iodic acid upon the protoxide of tin (*stannous oxide*); now called *stannous iodate*. So *† proto-hydrochlorate* (*proto-muriate*), *† proto-hydrid* salt, a salt formed by the action, on a metallic protoxide, of hydrochloric (muriatic) acid or other haloid acid (see Haloid). *† Proto-hydrate*, the hydrate of a protoxide, as proto-hydrate of lime $CO.H_2O$. Hence *† Proto-combination*, combination of the protoxide.

These terms are common in chemical writings of the first half of the nineteenth century, but now belong mostly to the history of chemistry.

c. In Organic and Physiological Chemistry and Pharmacy, *proto-* occurs in senses having little or no connexion with a or b, but rather akin to its use in 1 or 2.

Thus in *proto-catechuic acid* $C_7H_6O_4$, the name was given because the substance has some resemblance to catechuic acid or catechu ($C_{15}H_{14}O_6$), but has a simpler composition. *Proto-albumin* were the albuminate first produced in the process of digestion from the 'acid-albumin', and are now called *primary proteoses*. *Protolactic acid* is the first product of the action of alkalies upon albumin or protein.

(Also. The functions of the *provost des mareschaux de France* in the 15th *c.* appear to have been those of a military provost-marshal, although they were subsequently extended and changed; thus Cotgrave also explains *Provost des Mareschaux* as 'A Provost Marshall (who in other both inferiours, Judge, and Executioner) punishes theeberdes bankbeate, Cheaters, Free-booters, high-way robbers, lasie rogues, or vagabonds, and such as weare forbidden weapons'. Littré has '*prévôté des maréchaux*, an officer appointed to watch over the safety of the highways within the limits of a *gîte-royale*, called also *prévôt de la maréchaussée* [i.e. *provost of the marshalsea*]'; in which the military functions have disappeared. For these Littré has *prévôté de l'armée*, *prévôté des régiments*, and in the 1877 *prévôté générale de la marine*, and *prévôté maritime*. The 15th *c.* *F. provost des mareschaux* might have been rendered 'marshals' provost'; but it was easy to see how it became *provost-marshal*, within certain limits under the influence of court-martial, into which perhaps under the influence of *marshal and martial*, whereby we find also *law marshal* and *provost martial*, showing that the latter was sometimes at least taken to be 'war provost'.)

[*Note.* The loss of the *r* of L. *prōra* in the Romanic *proa* is universal, but is said to be accomplished in Genoese, which may be the source of the other Mediterranean forms, and of It. *prua* and F. *proue*. See F. *prune* might also represent a Romanic **prōda* (or **prōta*) preserved in It. *proda* prow, which may have arisen from L. *prōra* by dissimilation of *r* becoming *d* after *r* preceding, as in It. *rado*=L. *rārus* rare. But some would refer It. *proda* to OHG. *prord*, *prort* (=OLG. *brord*) point, brink. See Hirt in *Z.f.r.Ph.* XXVIII. 47, and articles there referred to.

The earlier Eng. spellings *prou*, *prow*, point to the pronunciation (prū). But *prow* may also have arisen (prō)=F. *proue*. *Prore*, *prowe*, are analogous to *Dryden* and Scott's *prore* with *before*, *plore*; Shirley with *More*, but also with more; Thompson to adopt with *Dore*, *Roar*, but also with *bore* and *more*. Walker 1791 cites 3 orthoepists for each pronunciation. Smart 1836 gives only (prou). It is possible that there were in 16th c. two forms (prō and (prou), corresp. to Romanic *prora*, F. *proue*, and to F. *prora* respectively, the form (prou) being in 16th c. diphthongized to (prau): but this pronunciation may also have arisen in the 18th c. as in *prowl*, mostly from the ambiguity of the spelling *ou*.]

Prune (prūn), *v.*[1] *Obsolescent.* [ME. *proine, proyne, proyne*, of uncertain origin, but in its phonetics apparently French: agreeing in form with Prune *sb.*[2], of which it has been supposed to be a specialized fig. application. This is not impossible; but Prune *sb.*[2] is not found till later, nor was it common till about 1550, and its original, OF. *provignier*, is not used in this sense.

To identify them, it would be necessary to ascertain that in Anglo-Fr. (in Falconer's) the verb had acquired this changed use, and been taken into Eng., long before its original French sense was adopted. Evidence of the kind in Anglo-Fr. has not been found. There appears to be some relationship between this and the synonymous *proin*, Prune *sb.*[1] Cf. the Chaucer quot. *c* 1386 in A. 2.

1. In ancient Athens, A member of that division of the Council of Five Hundred which was presiding at the time.

3. *transf.* A president, chief.

1847 GROTE *Greece* II. x. III. 101 It is probable also that the members of that senate (the Areiopagus), and those of the prytanes of the presidency, were of the most durable and confirmed nature. 1858 A. LANG *Making Relig.* xvii. 277 In polytheism that conception is necessarily obscured, throwing itself finally either in the Prytanis, as President of the Immortals, such as Zeus; or in Fate.

2. Each of the ten divisions of the Athenian Council of Five Hundred during its presidency; also the period of five weeks during which each division presided.

1807 ROBINSON *Archæol. Græca* I. xxii. 313 If these officers did not carry their cases before the ninth prytany, they were to pay double. 1847 GROTE *Greece* II. vi. Ps., Words beginning with this consonant combination (with the exception of a few international monosyllables, *psa, psha, psi*) are all taken or formed from Greek, in which language the combination is frequent, and has been represented from about B. C. 540 by the single letter Ψ, ψ. The only words in *ps-* which go back to Old English times are the mathematical terms *psalter* sb. and *vbs.*, and *psalter*. *Psalterion* and *psaltery* appear in the 13th c.; *psaltry*, and some few of its compounds, occur in Wyclif. All the other *ps-* words are of Modern English formation, five before 1600, the great majority of the 19th c. In *psalm* the initial *p* was dropped already in O.E., as in OF. and the cognate languages, and in English has never been restored in pronunciation (as it has been in French and German). This appears to have caused as a precedent for dropping the *p* in the pronunciation of other words, an overwhelmingly general one often leading to ambiguity or to a disfiguring of the composition of the word. As the *p* is now pronounced in French, German, and other languages, as well as by Englishmen in reading Greek, and by many scholars in English also there being no organic object in the English mouth to prevent it), it is here omitted, except in the *psalm, psalter* group, as an optional pronunciation which is recommended especially in all words that retain their Greek form in *g. psoas, psychic*, and is scientific terms generally, which have not been irrationally mutilated by popular use.

From the early forms in the cognate langs. as well as Eng., it is seen that the initial *p* was often dropped at an early period; in many of the langs. it has been restored after the L. and Gr. original, and in that case is also pronounced. Eng. is almost alone in spelling *ps*, and sounding only *s*. The ME. spelling (*p*)*sawme*, and modern pronunciation (sōm), are due to F. (*p*)*saume*: cf. *balm, calm*, etc.]

Pseudo- [sū-, stădz], before a vowel usually **pseud-**, repr. the Gr. combining element *pseudo-*, *pseud-*, 'false, falsely', from stem of *pseudēs* adj. false, *pseũdos* falsity, falsehood, *pseudō-ai* to deceive, cheat, *pseũdesthai* to be false, speak falsely. Forming in Greek many compounds; with sbs., as *pseudomártys*, -*ru* false witness, *pseudoménias* false apostle or messenger, *pseudópous* a false member, *pseudóxynos* mock-silver; with adjs. or adj. formations = falsely, as *pseudotrópos* speaking falsely, *pseudoteuthḗs* feigned to be rich; and sometimes with verbs, as *pseudoneuō* to falsify.

Some of these Gr. substantives and adjectives were adopted in late Latin, esp. terms of natural history, as *pseudamphíbius* bastard alkanet, *pseudochírio* false wasp, *pseudocrocagrídes* false emerald, and words of Christianity, as *pseudapostolus*, *pseudochristus*, *pseudoprophḗta*, etc. In later times, *pseudo-* was prefixed also to L. words, as *pseudoflavus* bastard yellow, *pseudolapsides*, *pseudotutor* (Jerome). Thence it became common in mod.L., as in *pseudoalcter*, *pseudomuscae*, etc.: see Du Cange.

In English, *pseudo-* appears first in Wyclif, viz. in adaptations of L. words of the Vulgate, as *pseudochrist*, *pseudoprophet*, and in words formed after these, as *pseudo-christ*, *pseudo-frere* [= friar], *pseudo-priest*. Few examples occur in the 15th and 16th c., and in these *pseudo* was usually written separately, as an adj.: see PSEU. word. But after 1600 the combination of *pseudo-* with a sb. became common: at least 20 examples appear before 1700, and 20 more before 1800. By 1800 *pseudo-* had become a living element profitable at will, instead of the adjective *false* or *spurious*, to any sb., and the examples during the 19th c. are very numerous. To adjectives *pseudo-* began to be prefixed in the 17th c.; but examples are not numerous till the 19th c., when the use with an adj. became nearly as free as with a sb.

In the dictionary, words in *pseudo-* are dealt with in three groups: 1. Those in which the two elements have their obvious and ordinary sense, *pseudo-* being thus equivalent to an adj. or adv.

2. Scientific and technical terms, esp. in general use, in which either the element with which *pseudo-* is combined, is not a separate word in English, or if it is, the combination is a permanent term, with a special meaning.

3. Important combinations and compounds, in general use, or of long history, or having derivatives: these are treated as Main words.

I. Prefixed to any noun or adjective, forming combinations, mostly nonce-wds., with the sense 'false, pretended, counterfeit, spurious, sham, falsely so called or represented; falsely, spuriously, apparently but not really'. Here *pseudo-* is properly hyphened.

An *pseudo-* can be prefixed to any word almost as freely as *ti* can be qualified by 'false' or the like, the possible combinations are unlimited in number, and no purpose would be served by giving a long list. Instead of this, a course of quotations is given in chronological order to illustrate the use, a. with a substantive, b. with an adjective.

2. Special combinations: nearly all terms of modern science, (*a*) indicating close or deceptive resemblance to the thing denoted by the second element, without real identity or affinity with it; or sometimes simply denoting an abnormal or erratic form or kind of the thing; (*b*) denoting something which does not correspond with the reality, or to which no reality corresponds, as false perceptions, errors of judgement or statement.

The second element is properly Greek, but very frequently Latin, and occasionally English: in the last case almost always hyphened, but can so usually in the other two except when the whole form *pseudo-* is used before a vowel.

Gr. *ψῡχή* (in L. *psȳchē*) breath, f. *ψῡχειν* to breathe, to blow, (later) to cool; hence, life (identified with or indicated by the breath); the animating principle in man and other living beings, the source of all vital activities, rational or irrational, the soul or spirit, in distinction from its material vehicle, the *σῶμα* or body; sometimes considered as capable of persisting in a disembodied state after separation from the body at death.

In Mythology, personified as in 1-10. By Plato and other philosophers extended to the spiritual principle, conceived to animate the general system of the universe, as the soul animates the individual organism. By St. Paul (developing a current Jewish distinction between PNEU, SPIRIT, spirit or breath, and SOUL, soul, used for the lower or merely natural life of man, shared with other animals, in contrast with the higher or spiritual, conceived as a higher element free to receive influences supervening upon the original constitution of unregenerate human nature: see PNEUMA 2, 3, PNEUMATIC 2. (For this and other developments in pre-Christian Judaism, and the N. T. writings, see R. H. Charles, *Hist. of the Doctrine of a Future Life*, 1899.)

Psychological (sī-, sĭkōlǫ·dʒĭkăl), *a.* (*sb.*) [f. as PSYCHOLOG-Y + -ICAL.]

1. Of, pertaining to, or of the nature of psychology; dealing with or relating to psychology.

1800 D'ISRAELI *Calam. Auth. Pref.* 2, I would paint what has not been unhappily called the psychological character. [Note] From the Grecian *Psyche*, or the soul, the Germans have borrowed this expressive term. 1818 COLERIDGE *Lect. Sc. Method* 8, as Shakespeare was preparing two Methods of music, and besides the Psychological Method, he had also to attend to the Poetical. [Note] We beg pardon for the use of this barbarous epithet; but it is one of which our Language stands in great need. We have no single term to express the Philosophy of the Human Mind. 1873 H. SPENCER *Stud. Sociol.* xv. 380 Whether the minds of men and women are or are not alike; are obviously psychological questions. 1879 G. ALLEN *Colour-Sense* iii. 17 To trace out a few of the main steps in the evolution of sensuous forms, from the strictly psychological point of view.

2. Loosely used for PSYCHICAL: Of or pertaining to the objects of psychological study, or of pertaining to the mind, mental: opposed to *physical*.

Philos.* II. xviii. 260 Powers peculiar to that psychological unity which we call the mind. 1857 BUCKLE *Civ.* I. 6 Some physical process, to which is in many minds, the psychological effect in question has, by the influence of custom or weakness, been attached. 1892 FREEMAN *Hist. Whatever action the State Church may be entitled or without any psychological effect. 1902 HARNACK *Outlines Christ.* 1. 20 Different generations have lived on very different psychological levels, and with very different degrees of psychological intensity.

b. *Psychological moment*, = *F. moment psychologique*, applied to 'the moment in which the mind is in actual expectation of something that is to happen' (Hatzfeld *Dict. Générale*); the psychologically (or rather, *psychically*) appropriate moment; often misused for 'the critical moment', 'the very nick of time', without any reference to psychology or to the mind.

The French expression arose in Paris in December 1870, during the Siege, when it was asserted to have been used by the German *Kronz Zeitung* in reference to the bombardment of the city, and explained to mean that, as the bombardment had as its aim to act upon the imagination of the Parisians, it was necessary to choose the very moment when the imagination, already shaken by famine and perhaps by civil dissension, was in the finest state to be effectively influenced. *Temps, La Légende de Paris*, 1871, p. 267; Eng. tr. p. 240. But the phrase with its explanation was due to an error of translation, in which the expression actually used by the German journal, *das psychologische Moment*, the psychological 'momentum', power element, or factor, in the case (see Hemsterh. *s. Momma* 56, was mistaken for *der psychologische Moment*, the psychological moment of time. The article in the *Neue Preussische* [Kreuz] *Zeitung* of 18 Dec. 1870, p. 1, col. 3, says that very urgent psychological considerations spoke against opening the bombardment before the beginning (sic) by the Parisians upon the raising of the siege by sorties of relief should be contemplated; and continued, 'in all consideration the psychological momentum or factor must be allowed to play a prominent part, for without its cooperation there is little to be hoped from the work of the artillery'. That misinterpreted to German pedantry, the commonplace moment *psychologique* was ridiculed by the Parisians, and became a peculiar phrase or 'slang' for 'the fitting or proper moment'; and with this connotation it has gained equally unwarrantable into English journalism.

1871 tr. *Sarcey's Siege of Paris* x. 241 The phrase became current and even fashionable. One used to say 'I feel hungry; it is the psychological moment for eating three or four times a day'. 1892 *Daily News* 19 Apr. 5/4 Unless we listen to New York, there is nothing to do but to forgo taxes and economize at the very psychological moment. 1897 *Westm. Gaz.* 30 Oct. 1/1 The Prince is always in the background, and takes up at the psychological moment—as on a very hard-worked and sometimes tortured phrase. 1901 *Contemporary Rev.* Mar. 373 This was the psychological moment of the whole operations and ... Dr. Weir took advantage of it. 1907 *Expositor* Sept. 190 'Hear' in the Gospel means a psychological moment in the evolution of the Messianic consciousness full of significance for the Saviour's purpose.

Psychologist (*sɪ*-, *saɪkŏ·lŏdʒɪst*). [f. PSYCHOLOGY + -IST: cf. *Mycrologist*.] One who makes a study of, or is skilled in psychology; a student or teacher of the science of mental phenomena.

1850 Mrs. Jameson *Female Sov.* (1854) 158 Psychologues like Salem might declare that the scourge of edge shifting was to be found in those philosophers who ... assume that they have overthrown by a single smart trope truths only to be known by combining a multitude of observations.

Daniel* ii. 1. 191 The question taught by all our logics and psychologies. 1884 J. *Tait Mind in Matter* (1892) 110 The Philosophy of Spinoza results in the Psychology of Hume.

[Note. Hallaby this word not any of the group existed in Greek. *Psychologia* began, in the modern Latin form *psychologia*, in Germany in the 16th c. It is used by Velthemius van Velsenus, *Lehrbuch der Psychologie*, 1611, I. 38, to have been used by Melanchthon as title of a prelection, and it was employed by J. C. Freigius in 1503; but was introduced into literature, 1590-91, by Goclenius of Marburg and his pupil Casmann (*Psychologia anthropologica sive animæ humanæ doctrina*). It was thenceforth used to consider *Psychologia* and *Somatologia* or *Somatologia* as the two parts of *Anthropologia*, and, in this sense the word is found frequently in the medical writers of the 17th c., as in Blancard's *Lexicon Medicum*, 1679, and in French in Blondel, *Analogie de l'Homme*, 1690. One first Eng. quot. of 1693 is from a transl. of Blancard. In French, according to Hatzfeld-Darmesteter, it had been used in the 16th c. by Taillepied in the sense of 'the science of the apparition of spirits'. In a philosophical sense, it was used by some Latin writers, as by Thomas Gravis (*Arx Animæ sive Logica*, 1661), by whom *Physica* or Natural Science was divided into the domains of *Pneumatologia* the science of spirits or spiritual beings, and *Somatologia* or *Physiologia* the science of material bodies; *Pneumatologia* contained the three subdivisions, *Theologia* the doctrine of God, *Angelographia* doctrine of the nature and offices of angels (good and bad), and *Psychologia* the doctrine of human souls. The modern sense begins with Chr. von Wolff (*Psychologia Empirica* 1732, *Psychologia Rationalis* 1734) followed by Hartley in England 1748, and Bonnet in France 1755. The term was also employed by Kant, but was not much used by the modern languages before the 19th c.]

†**Psychomachy** (*sɪ*-, *saɪkŏ·măkɪ*). *Obs. rare*. [ad. late L. *psychomachia* 'conflict of the soul' (title of a poem of Prudentius *c* 400): cf. Gr. ψυχο-μαχία 'fight for life' (Polybius): f. Gr. ψυχή life, soul + μάχη fight.] Conflict of the soul.

1629 Gaule *Holy Madnesse* 119, I have prophesied the murders, rapes, and sweats of a Mystical Pseudomachia. 1656 Hunter *Gleas. Psychomachy*, a war betwixt the outward body and the soul. 1748 Phillips, *Psychomachy*, a conflict, or war of the Soul.

Psychomancy (*sɪ*-, *saɪkŏ·măn(t)sɪ*). [ad. Gr. type **ψῡχομαντεία*, f. *ψυχόμαντις* a necromancer: see PSYCHO- and -MANCY.]

Mather *Magn. Chr.* III. ii. xxviii. (1852) 309.

b. Occult intercommunication between souls or with spirits.

1883 *Sat. Psychometry (*sɪ*-, *saɪkŏ·mĕtrɪ*). [f. Gr. ψῡχο-, PSYCHO- + -μετρία measuring: lit. 'soul- or mind-measuring', but the application in sense 1 does violence to the etymology.]

In English, the *p* of initial *ps-* is commonly omitted in pronunciation, so as to confound words in *ps-* with those in *s-*. As the *p* is pronounced in French, German, and other languages, as well as by Englishmen in reading Greek, and by some scholars in English, the full form is here given, as an optional pronunciation often to be preferred. Five of the words are in familiar use.

‖ **Pteleo.** The existing Gaelic *tirmachan* evidently goes back, through the cited *tarmachan* and *tormican*, to the earliest to occur in any text, *tarcnichan*. It has the form of a diminutive of *tirmach* (cf. *balachan*, dim. of *balach* boy, *bodachan*, dim. of *bodach* hobnob, etc.) and elevated to a genus as a synonym to *lochy* (as in Armstrong's and the Highland Society's Dictionaries). The word has thus all the appearance of being native; *i faburi*, also, is to remind that the name of a bird found only on the Highland mountains should have been Gaelic. But *tarmach* has no obvious derivation in Gaelic; and some Celtic scholars think that it may be a foreign word which has got on a Celtic pedestal. On the other hand, the word, if not from Gaelic, is without any etymology in Lowland Sc., for *termagant* can only be remembered a popular perversion of the 'quarrow-gaun' order.

Public school. A school which is public, in senses varying with time and place.

The Latin *publica schola* goes back under the Roman Empire to the fourth (and by implication, the first) century A.D., and also appears in the Capitula of Louis the Pious A.D. 825, in the sense of a school maintained at the public expense, national or local.

1. In England, originally, A grammar-school founded or endowed for the use or benefit of the public, either generally, or of a particular locality, and carried on under some kind of public management or control; often contrasted with a 'private school' carried on at the risk and for the profit of its master or proprietors. In recent English use (chiefly from the 19th century), applied especially to each of the old endowed grammar-schools as have developed into large boarding-schools, drawing, from the well-to-do classes of all parts of the country or of the empire, pupils, who in the higher forms are prepared mainly for the ancient universities or for the public services, and to some large modern schools established with similar aims. As it is a general characteristic of these large schools that order is maintained and discipline administered to a great extent by the elder pupils themselves, this has come to be a recognized feature of the English public school, and is often the prominent notion in such phrases as 'a public school education' or 'training', 'the English public school system', and the like.

The Latin form appears in the 16th c., and is frequent from the 19th c. as applied to an endowed free grammar-school. The English form *public school* is known from 1580, and was in double use early. Down to the 18th c. it was very generally opposed to 'private school', and subsequently to a 'public school' was also contrasted with schools of lower grade in a sense. The term was officially used in 1861 in the appointment of a Royal Commission, and in 1867 in 'An Act for the better government and extension of certain Public Schools'. To this are applied the two ancient endowed grammar-schools in colleges of Eton, Winchester, Westminster, Harrow, Rugby, Charterhouse, Shrewsbury, three have somewhat later orders of as "the Seven Public Schools"; but the name is generally used to include these and many more (now twenty or more large schools, ancient and modern, of similar organization, which are not separated by any definite line from other endowed schools that depend upon a more local constituency.

Puck, *sb.*[2] [Origin uncertain: see Note below.]

1. (Also *puck-hawk.*) The nightjar or goatsucker.

1683 TORRIANO *Diction. New. Ital.* & *Eng.* The 'puck' would fly before her, and the did not dare to swear by puck. 1885 SWAINSON *Prov. Names Birds* 97 In many places it is considered that animals either becomes blind or are infected with disease after being sucked [by the nightjar]. The country-people in West Sussex call this nocturnal 'puck' or 'pucklebird'—perhaps from Puck, a malignant spirit—and the best 'knell' puck bird.

2. A disease in cattle attributed to the nightjar.

1854 VINCENT *Cattle* 382 In some parts of Sussex, under the name of the *puck*, the farm-yard, on the side, in the part usually affected. 1879 DARBISHIRE *Diseases Dogs* (1890) 24 Anthrax,...a disease of cattle, known in the vernacular as...quarter ill;...[also ill;...'pest';...'puck,' 'shoot of blood', &c. [Note. *Puck-fistula* and *puck-ridge* are all rural names of the Goatsucker or Nightjar: it is not clear whether the two latter are compounds of *puck*, or whether this is itself short for one or other of them. As the bird is the object of much superstition and even superstitious dread, it is quite possible that the name is derived from *Puck sb.*[1]; either as 'belong. Puck's bird', or itself a puck or demon-bird; but the composition and meaning of *puck-ridge* then remain unexplained. The conjecture of some that the name may be derived from Puck *v.* to lie, stoke, and ridge, OE. *hrycg* back, from the notion of its carrying the backs of sleeping cattle and thus inflicting on them a fatal disease (see PECKHORSE, 1901, 1789) would app. withdraw the group from any connexion with Puck *sb.*[1], except as a secondary association. But *ridge* may be an oral corruption of some other word.]

Puck (*pŭk*), *sb.*[3] [Origin obscure: cf. PUCK *v.*] A flat india-rubber disk used for a ball, in hockey or hockey on the ice in Canada.

1891 *Field* 7 Mar. 320/1 The ball (or 'puck'; and it is called by that name of India-rubber, circular in shape, about two inches thick, and with a diameter of about four inches. The game is played with wooden sticks, and no striking with the stick is allowed, only pushing the 'puck' along the ice. 1894 *Outing* (U.S.) XXIII. 493/1 These two handle the puck somewhat rather puck as Pulsometers handles the black keys of a piano.

II. 6. A preparation of food of a soft or moderately firm consistency, in which the ingredients, animal or vegetable, are either mingled in a farinaceous basis (chiefly of flour), or are enclosed in a farinaceous 'crust' (cf. DUMPLING), and cooked by boiling or steaming. Preparations of batter, milk and eggs, rice, sago, tapioca, and other farinaceous substances, suitably seasoned, and cooked by baking, are now also called puddings.

The earliest use connecting this with (1) apparently implied the binding of the composition in a bag or cloth (*pudding-bag* or *-cloth*), as is still often done; but the term has been extended to similar preparations otherwise boiled or steamed, and finally to things baked, so that its meaning and application are now rather indefinite.

Phrase. Suggestion as to the origin of the name *puffin* have recently supposed some connexion with the verb or *sb. puff* or the adj. *puffy*. Thus it has been conjectured to refer to the 'puffy' or corpulent appearance of the bird (1902, 1903, 1904), to the plumpness of the young, formerly considered a delicacy (cf. the simile 'as plump as a puffin'); also to the soft downy clothing of the young (Prof. A. Newton). Others have sought an explanation in the remarkable 'puffed-out' beak, or in a puffing sound uttered by the bird or by young when asleep. Cahir (1902) expressly declares that the name is derived 'a natural vice *puffin*'. But, as the MS. forms of the name are spelt *poffe*, and the earliest known pronunciation of the bird under this name was with Cornwall and Scilly, it is evident that these conjectures rest on erroneous bases. The name may even have come from Cornwall, and its change to 'puffin' may be due to 'popular etymology' in English. The erroneous sense 1, in this to Rep, who retained young specimens of the shearwater from the Isle of Man for puffins, and applied to them the name *Puffinus anglorum* (applied by Gesner to the real puffin), which has unhappily been retained in ornithological nomenclature.]

† **Puffin**[2]. *Obs.* [app. f. Puff *v.* or *sb.*: in sense 2, perh. with some notion of connexion with prec., which by 1600 was prob. popularly associated with puffing. The other senses appear to be more or less distinct formations from *puff*.]

Pump (pʌmp), *sb.*[1] Also 5–7 pompe, pumpe, (5–8 pomp, poompe, 6 poumpe): see also Pumpe *sb.*[2] [Late ME. *pumpe*, *pompe*, = early mod.Du. *pompe*, Da. *pomp*, LG. *pumpe*, *pumpe*, mod.Ger. *pumpe*; whence Da. *pompe*, Sw. *pump*; also Fr. *pompe*.

Machines for raising water were in ancient and mediæval use, but no trace of the name *pump* appears before the 15th c. This is, as yet, known first in Eng. (1440), in the sense of a ship's pump, for pumping out the bilge-water, in which use it was quite common 1450–1600. In Du., LG., Scand. it is not recorded in this sense before the 16th c.; in Fr. cited 1517 in Hatz.-Darm.; in Da. a 1556 in Verelius & Verdam, in Ger. c 1550 (Hans Sachs in Grimm). Florio (1573) gives the Da. only the sense 'bilge', *de pompe* the schips, 'sentine' de la naviere, sentina', *pompen*, *vidrapompen*, 'vuister Tonne, ventilatorium tympanum', but Kilian (1599) has *pompe* in every sense of a ship's pump, and a pump generally. In Da. diction. *pumpe* is found a (1763) in sense of a pipe or tube of wood or metal, or a machine for the conveyance of water under ground, a sense also found in Frisian, and in some Low German dialects. In view of these dates and various senses, it is not easy to form any inference as to the language in which the word *arose*; but the probability lies between English and Danish (or Low German); in either case it was pech. first in nautical use. The primary sense seems to be liveness that of 'pipe, tube', and an echoic formation from the sound of the plunger striking the water. In favour of the latter cf. the collateral form *plumpe*, Palsgr. 28/1, found as early as 1417, also LG. *plumpe* pump; and conversely Ger. *pumpe* the hollow sound of a blow, *pumpen* to make such a sound (Grimm), admittedly echoic. The Ger., Sp., Pg. *bomba* (pump), viewed by Diez as the source of the French, may have been derived from F. *pompe*, but is more prob. an independent though analogous echoic formation. The It. is *tromba*, orig. = trumpet, tube; but Venetian, and some other north It. dialects have *pompa* from Fr. or Ger.]

I. 1. A mechanical device, commonly consisting of a tube or cylinder in which a piston, sucker, or plunger is moved up and down by means of a rod, or rod and lever, so as to raise water by lifting, suction, or pressure, the movement of the water being regulated by a suitable arrangement of valves or clacks; from early times used on board ship to remove bilge-water; also, from 16th c., for raising water from mines, wells, etc.: now, a generic term for a great variety of machines and mechanical devices for the raising or moving of liquids, compressing or rarefying of gases, etc.

Pumps are variously qualified according to the principle of action, manner of construction, means of operating, purpose, etc., as *force*, *lift*, *lifting*, *suction pump*; *barrel-*, *cistern-*, *chain-*, *double-acting*, *single-acting*, *centrifugal*, *double-*, *single-cylinder*, *direct-acting*, *steam*, *rotary*, *spiral pump*; *bucket-*, *chamber-*, *plunger-*, *lever-*, *hydraulic*, *bilge-*, *brake-*, *screw-*, *diving*, *dental*, *deep-well*, *dredging*, *fire-*, *gas-*, *mining*, *oil-*, *pneumatic*, *sailing*, *stomach pump*, etc.; for many of which see the specific words.

Pump (pʌmp), *sb.*[3] Also 6 poumpe, pompe, 6–7 pompe. [Of obscure origin; no word similar in form and sense has been found in other languages. Suggestions have been offered of its identity with PUMP, and with POMP *sb.*, but without satisfactory grounds. The OFr. *pompulle* and *pompilion*, which have been compared, are so called from their inflated or pipe-like legs; and there does not appear in the early use of *pompe* any clear connexion with *pomp* or show. It may have been an echoic word, suggested by the dull flapping sound made by slippers as distinct from the stamp of heavy shoes.]

A kind of light shoe, originally often of delicate material and colour, kept on the foot by its close fit, and having no fastening; a slipper for indoor wear; hence (in 17–18th c.) applied to a more substantial low-heeled shoe of this character, esp. one worn where freedom of movement was required, as by dancers, courtiers, acrobats, duellists, etc.; now *spec.*, a light, low-heeled shoe, usually of patent leather and without fastening, worn with evening dress and for dancing. See also PUMPS 3.
